

The Svay Rumpear Children's Project is a charity project that works to help some poor children and orphans in the Svay Rompear commune of Svay Rieng province in Cambodia. It was started by Dr. Sar Thona, who spends his own money and also some funds that he received from foreign philanthropists. So far he has helped the children with their study materials, food and some health care. Observing that the children in primary school are having a hard time without adequate toilets, recently a philanthropist in the Netherlands helped build some toilets, which is now complete. This is a huge help to the primary school, all the children attending it and also the teachers. The school management, the children and teachers are very happy and would like to thank Jack, Peter and all the people who helped build this facility. Your support helps us grow and be full of smiles and hope. We wish you all happiness and blessings in life.
